PROFESSIONAL SUMMARY

Front-End Developer with 6 years of experience building responsive web and mobile applications in finance, e-commerce, and networking. Proficient in React.js, React Native, TypeScript, Redux, and Next.js. Skilled in testing, accessibility, and Agile collaboration to deliver high-quality products.

EDUCATION

- **Birla Institute of Technology, Mesra: Bachelor of Engineering** *2015 – 2019*

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript | **Frameworks:** React.js, React Native, Next.js, Redux, Redux Saga | **Testing:** Jest, Cypress | **Version Control:** Git, GitHub, GitLab | **Tools:** Visual Studio Code, Xcode, JIRA | **Operating Systems:** Windows, macOS, Linux

EXPERIENCE

- **Accenture: Custom Software Engineering Analyst** *January 2025 – Present*
  - **Project Details:** E-commerce Web Application for a Global Media & Entertainment Company
  - Designed and implemented core features for a global mass-media, telecom and entertainment app
  - Focused on listing, cart functionality, promo code application, and confirmation pages.
  - Built responsive, reusable UI components using Next.js, TypeScript, Redux, and Redux-Saga
  - Wrote unit tests in Jest to ensure high code quality, minimize regressions, and support smooth releases

- **Accenture: Custom Software Engineering Analyst** *September 2023 – December 2024*
  - **Project Details:** End-to-End Financial Workflow Interface for a investment management and insurance company
  - Developed and improved the overall web experience by enhancing UI, functionality, and accessibility across key modules, including the dashboard, setup page, contributions, negative contributions, loans, review & submit, and confirmation screens using Next.js, React.js, Typescript and Redux
  - Refined the user interface to enhance usability, accessibility (WCAG standards), and design consistency
  - Implemented unit and integration tests using Jest and Cypress to ensure stability and reliability
  - Collaborated in Agile teams to deliver user-centric features, proactively identifying, debugging, and resolving issues to maintain high application performance and meet sprint goals efficiently

- **Accenture: Custom Software Engineering Analyst** *July 2021 – August 2023*
  - **Project Details:** iOS Application for a major US Car Accessories Retailer
  - Developed and enhanced a mobile application designed to help associates provide customers with a seamless and engaging experience while selecting car accessories such as tires, batteries, wipers, and more
  - Designed and implemented key app sections including the accessories list screen, cart, order details, order summary, order confirmation, payment, and other pages using React Native, Typescript, Redux and Redux Saga
  - Performed debugging and resolved critical bugs to improve app stability and performance following Agile processes
  - Maintained 85% unit test coverage with Jest to ensure defect-free releases

- **Cognizant Technology Solutions: Senior System Engineer** *July 2019 – July 2021*
  - **Project Details:** Retirement Plan Transfer Tracking App for a leading US financial company
  - Developed a fund transfer web application enabling customers to access and track transfer requests for a retirement plan recordkeeping financial holding company
  - Implemented web accessibility features to enhance usability for users with disabilities
  - Designed scalable and consistent state management using React.js, Redux, and TypeScript
  - Achieved 80% test coverage with Jest, ensuring application stability and reliability
  - Collaborated with Agile teams to deliver features incrementally and meet project milestones efficiently

- **Cognizant Technology Solutions: Software Engineer Intern** *January 2019 – March 2019*
  - Developed an e-learning platform for course purchase and upload using React.js and Redux
  - Created responsive UI components aligned with project specifications
  - Implemented unit tests in Jest to validate key features
